

School of Computer Applications and Technology

Mid Term Examination - Apr 2026

Masters of Computer Applications/M.Sc. CS/Int. BCA+MCA

Duration : 90 Minutes

Max Marks : 50

Sem II - E1PY201B - Object Oriented Programming with JavaGeneral Instructions*Answer to the specific question asked**Draw neat, labelled diagrams wherever necessary**Approved data hand books are allowed subject to verification by the Invigilator*

- 1) Explain what bytecode is and why it is important in Java programming. CO1(3)
- 2) Explain the execution of a Java program. Include JVM, bytecode, and Java source structure. CO1(5)
- 3) Explain various String comparison methods. CO1(5)
- 4) Analyze the following code and write the output. Justify your answer and explain the concept of enhanced for loop. CO1(8)

```
class Test {  
    public static void main(String[] args) {  
        int arr[][] = {{1,2},{3,4}};  
  
        for(int[] row : arr) {  
            for(int val : row) {  
                System.out.print(val + " ");  
            }  
        }  
    }  
}
```
- 5) (a) What is the difference between Error and Exception? Give examples. (b) Explain how Java handles multiple exceptions using multiple catch blocks. Include rules for ordering catch blocks. CO3(8)
- 6) Explain Java Packages, its types, steps to create a package. How to access a package? CO2(9)
- 7) Given are two one dimensional array A and B which are sorted in ascending order. Write a program to merge them into single sorted array C that contain every item arrays A and B in ascending order. CO1(12)

OR

How do exception handling and abstraction together improve software reliability? Explain with scenarios and examples. CO3(12)
